

To determine the proper size of insulating rubber glove needed see instructions below.

1. Go round your hand with a measuring tape, leaving out the thumb. Measure the circumference around your hand.
2. Close the hand without excessive clenching and take the measurement.
3. For example, with a circumference around the hand of 24.5cm we recommend the next size up.

Recommended Size	6	7	8	9	10	11	12
Hand Measurement (cm)	14	16	18	21	24	26	28
